

**NetBrain<sup>®</sup> Consultant Edition 6.2**  
**Upgrade Instructions**

# 1. Upgrading Consultant Edition from 6.0 to 6.2

This document is a guide to introduce the mandatory steps to upgrade NetBrain Workstation Consultant Edition from version 6.0 to version 6.2.

Note that the following data or settings cannot be migrated in the upgrade. It is recommended to record the data or settings before upgrade.

- Layer 2 topology data (including Switch Groups, One-IP table and Global Switch Connectivity Table)
- Customized entries in Device Type table, Device Driver table, and Vendor Model table
- The settings in map update (including the schedule of map update)
- The settings in LAN discovery
- Customized CLI command templates
- Customized documentation templates
- Customized device icons
- Device NAT tables

Follow the following steps to complete the upgrade.

## Step1: Back up Data

---

Back up the data in the following location on the machine with NetBrain Workstation Consultant Edition 6.0 installed.

C:\Program Files (x86)\NetBrain\Workstation Consultant Edition\userData\Baseline

**Note:** If you changed the installation path when you installed the Workstation, replace C:\Program Files (x86)\NetBrain\Workstation Consultant Edition with your customized installation path.

## Step2: Uninstall NetBrain Workstation Consultant Edition 6.0

---

1. Click **Start > All Programs > NetBrain > Workstation Consultant Edition 6.0 >  Uninstall Workstation Consultant Edition.**
2. In the pop-up dialog, click **Yes** to confirm to remove the application and all of its features.
3. On the User Data page, select the **Delete all existing user data** check box, and then click **Next**.
4. On the Uninstall Complete page, click **Finish**.

### Step 3: Install NetBrain Workstation Consultant Edition 6.2

---

1. In the Workstation installation package, right-click the **setup.exe** file and select **Run as Administrator** to launch the InstallShield Wizard with administrative privileges.
2. On the Welcome page, click **Next**.
3. On the License Agreement page, read the license agreement and then click **I Agree**.
4. On the Choose Destination Location page, click **Browse** to specify a destination folder to install NetBrain Workstation and then click **Next**.  
The default installation path is **C:\Program Files (x86)\NetBrain\Workstation Consultant Edition**.
5. On the Start Copying Files page, preview the summary of the current installation settings and then click **Install**.
6. On the InstallShield Wizard Complete page, click **Finish**.  
The **Launch NetBrain Workstation Consultant Edition now** check box is selected by default.

### Step 4: Restore the Backup Data

---

Copy and paste your backup data to the following location.

**C:\Program Files (x86)\NetBrain\Workstation Consultant Edition\userData\Baseline**

**Note:** If you changed the installation path when you installed the Workstation, replace **C:\Program Files (x86)\NetBrain\Workstation Consultant Edition** with your customized installation path.

Then you can use your backup data to build a workspace after you log into the Workstation.
