NetBrain LIVE

Boston | Sep 30 – Oct 2

NetBrainLIVE 2024 is the place for network operations professionals to gather and experience the power of No-Code Network Automation. This 3-day event with more than 60 sessions and workshops will demonstrate how to apply no-code automation to the work you do everyday.

YOU will be immersed in Technology:

- Learn how to apply network automation to the task of network diagnostics and troubleshooting
- Detecting and preventing configuration drift, failover / resiliency and compliance issues
- Establishing protected change management processes by incorporating Network Intents into operational plans
- Understand the power of continuous network assessment to prevent outages and support service delivery goals
- See NetBrain deployed in multi-vendor, multi-cloud environment, providing seamless end-to-end visibility
- Learn how NetBrain can automate advanced operational challenges including security compliance, capacity planning, change and application performance
- Attendees will be given all of the conference materials including workbooks and example templates
- Companies with one or more students registered will be provided a one-year no-cost user seat for their instance of NetBrain

YOU will be immersed in Community:

- The agenda is designed to facilitate group discussions and smaller group idea sharing, including user fireside chats
- Build professional relationships with your peers across other similarly situated Enterprises and MSPs to share ideas
- Hear your peers discuss their adoption of NetBrain into their operational plan, transforming their core culture
