

NetBrain ACE+ provides partners with a full-feature cloud-hosted network automation platform with flexible licensing to run automated network assessments, complete with enterprise support and training. This powerful program allows partners to prove value by assessing and documenting real-world network conditions. Standardizing on a proven network automation platform to rapidly deliver comprehensive network assessments accelerates partner revenue by uncovering urgent network problems that create immediate sales opportunities, and by serving as a foundation for scalable, high-margin managed services.

Accelerate Revenue & Grow Your Business

- ## Enterprise-Grade Support & Enablement

- ## No-Code Automation & Golden Assessment Library

- Access **hundreds of pre-built AI-powered assessments** for network health, compliance, security, and performance from our Golden Assessment Library.
- Allows you to create custom assessments without programming using no-code automation.
- Provides continuous updates based on real-world outages and industry best practices.

Unmatched Deployment Flexibility & Scale

1. ACE+ Cloud (Partner-Hosted)

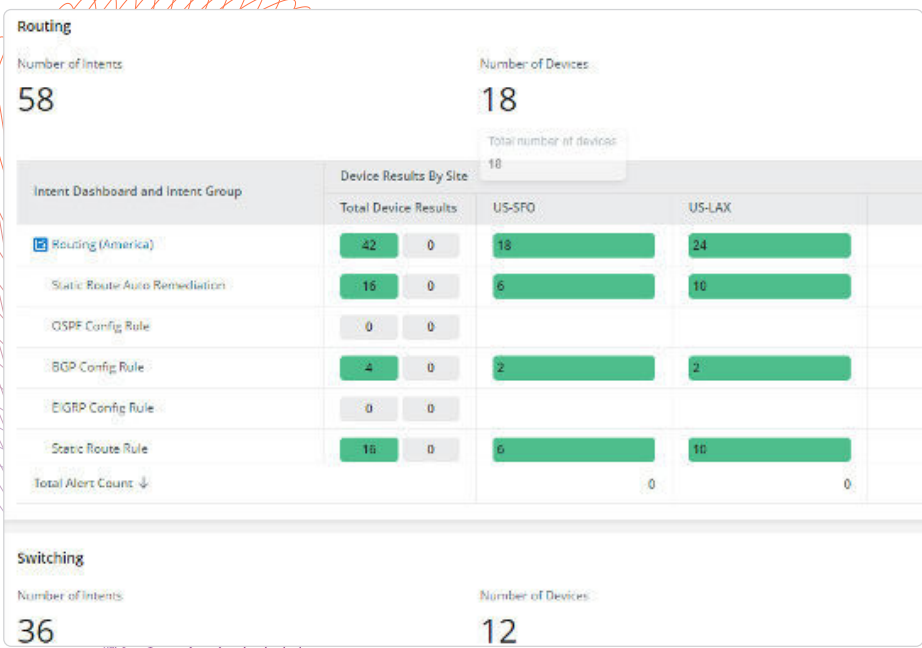

- For maximum scale and flexibility on large enterprise assessments.
- Run ACE+ on partner’s cloud instance (AWS, Azure, GCP marketplaces) or in partner’s data center. NetBrain provides the licensing and support.
- Features unlimited node support, scaling to any engagement size.
- Coming Soon: Simplified procurement and deployment via AWS Marketplace.

2. ACE+ All-in-One (Desktop)

- Ideal for larger assessments run directly from an engineer’s laptop.
- Node support up to 500 nodes.

Transform Your Service Delivery

NetBrain provides the tools to not only grow your business but also enable you to rapidly deliver comprehensive network assessments with gold-standard service.

- No-Code Automation & AI-Powered Insights
- Enterprise Support and Training
- Unlimited, Cloud-Hosted Licensing
- Recurring Revenue Opportunities
- **25% discount** on registered opportunities
- Enhanced deal discounting and right to sell NetBrain and services

Proven to save partners 20 hours per assessment with NetBrain’s Automated Network Assessment reporting.

Feature Comparison: ACE vs. ACE+

| Feature | ACE | ACE+ |
|---------------------------|-------------------------------|--|
| Node Support | Limited (e.g., 200 nodes) | Nodes |
| Deployment | Self-managed, partner-hosted | Deployment on Partner Cloud (AWS, Azure, etc.) or Partner datacenter or Desktop/Laptop Version (up to 500 nodes) |
| Automation | No-code automation basics | Advanced no-code + AI-powered automation |
| Support | Standard self-service support | Dedicated enterprise support & unlimited engineering training |
| Golden Assessment Library | Limited access | Full access (hundreds of pre-built automations) |
| Reporting | Basic automated reports | AI-powered conversational reporting |
| Scaling | Fixed capacity | Flexible, scalable to any engagement size |
| Ideal For | Small-scale trials and demos | Large-scale, revenue-generating assessments |

- Must submit a deal registration and commit to allowing NetBrain to demo to the customer
- Schedule NetBrain sales engineer training

About NetBrain

Since 2004, NetBrain has been a pioneer in network automation, empowering IT teams to transform operations by combining the power of innovative no-code and AI technology. Its Next-Gen platform shifts from reactive visibility to proactive observability, automating troubleshooting and change management workflows to gain operational efficiency, reduce human error, and deliver actionable insights. Powered by a real-time Digital Twin and intent-based automation, NetBrain facilitates automation creation at scale and lowers the barrier for automation adoption at all levels.
